Abstract

OBJECTIVES: To know the perinatal complications and delivery route in newborns from early and late teenage mothers. **MATERIAL AND METHODS:** Analytic, observational and comparative trial between early and late teenagers respect to delivery route and perinatal complications in the Hospital Nacional Daniel A. Carrión, between January 1995 to December 1997. **RESULTS:** 18,6% of deliveries were in teenagers; 21% were dystocic ones, more frequent in early teenagers ($p < 0,05$). Low birth weight newborns and those with perinatal complications were also frequent in this group ($p < 0,05$). **CONCLUSION:** Early teenagers had higher risk to present maternal and perinatal complications than late ones.

Keywords

Labor complications; Pregnancy in Adolescence; Infant Newborn; Birth Injuries.
