Abstract

The following work deals with the important issue in educational organizations that develops programs in the elementary and high school levels. They need to incorporate the social, cultural and economic organizations in these actions to generate a better and more dynamic education. The educational organizations have to incorporate in the programs and curriculum the technologies of information and communication, the families, and the social organizations to interact with the curriculum and the students.

Keywords

Formal educational organizations, learning communities, relationship curriculum, family and technologies of information and communication, educational organization.
