Abstract

The distribution of the genus *Brenthis* Hübner, [1819] in the Iberian Northwest is reviewed. The known distribution of the genus in the area is extended and *Brenthis hecate* ([Denis & Schiffermüller], 1775) is recorded from Galicia for the first time. The ecological and phenological requirements of this genus in the western limits of the Palearctic are discussed.

Keywords

Lepidoptera, Nymphalidae, *Brenthis hecate*, Distribution, Habitat, Phenology, Galicia, Spain.
