Abstract

Souroubea loczyi subsp. *loczyi* represents the first record of the family Marcgraviaceae in the Mexican portion of the Yucatan Peninsula. Until now, the species had been known in Mexico from the states of Chiapas, Tabasco, and Veracruz, as well as in Belize, Guatemala y Honduras. The material from Yucatan is described and compared with other material of the genus in Mexico as well as with relevant information available in the literature.

Keywords

Campeche, flora, Mexico.
