

# New and interesting Portuguese Lepidoptera records from 2023 (Insecta: Lepidoptera)

Martin F. V. Corley, José L. Fabião, Paulo Lemos, João Nunes  
& Jorge Rosete

## Abstract

Twenty species are added to the Portuguese Lepidoptera fauna, of which two are new for the Iberian Peninsula, and four species deleted, mainly as a result of fieldwork undertaken by the authors and others in 2023. In addition, second to fourth records for the country, new province records and new host-plant data for a number of species are included. A summary of recent papers affecting the Portuguese fauna is presented.

**Keywords:** Insecta, Lepidoptera, distribution, faunistics, Portugal.

## Novos e interessantes registos portugueses de Lepidoptera em 2023 (Insecta: Lepidoptera)

## Resumo

Como resultado do trabalho de campo desenvolvido pelos autores e outros, principalmente no ano de 2023, são adicionadas vinte espécies de Lepidoptera à fauna de Portugal, das quais duas são novas para a Península Ibérica, e quatro são eliminadas. Adicionalmente, são apresentados segundos aos quartos registos de espécies previamente conhecidas, bem como novas plantas alimentícias para algumas espécies. É apresentado um sumário dos mais recentes trabalhos relevantes para a fauna portuguesa.

**Palavras-chave:** Insecta, Lepidoptera, distribuição geográfica, faunística, Portugal.

## Nuevas e interesantes citas portuguesas de Lepidoptera en 2023 (Insecta: Lepidoptera)

## Resumen

Con el trabajo de campo efectuado por los autores y otros, principalmente durante el año 2023, se añaden veinte especies de Lepidoptera a la fauna de Portugal, dos de las cuales son nuevas para la Península Ibérica y se eliminan cuatro especies. Adicionalmente, se muestran segundos a cuartos registros de especies ya conocidas, así como nuevas plantas nutricias de algunas otras especies. Se presenta un resumen de los trabajos más recientes que son relevantes para la fauna portuguesa.

**Palabras clave:** Insecta, Lepidoptera, distribución geográfica, faunística, Portugal.

## Introduction

This paper is the eighteenth in the series of annual summaries of new knowledge of Portuguese Lepidoptera. It gives records of species of Lepidoptera added to the Portuguese fauna in 2023 and some unpublished earlier records, together with new province records not included in the checklist (Corley, 2015). Additional data include new data on larval host-plants within the country and second to fourth

records of species for the country. Papers published in 2023 and part of 2024 that relate to the Portuguese Lepidoptera fauna are listed and briefly summarised. Finally, an Appendix lists the new species for Portugal separately, with numbers indicating their position in the checklist.

The Portuguese moth recording scheme, “Rede de Estações de Borboletas Noturnas”, launched in 2021, has made a significant contribution to knowledge of moth species distribution in Portugal. New province records from this source from 2023 are included in this paper.

Twenty species new for Portugal are listed below, of which two are new for the Iberian Peninsula. Four species are removed from the Portuguese list.

In Corley et al. (2023) the number of Lepidoptera species recognised from Portugal was 2775. With the current paper and other papers mentioned herein this total has risen to 2794.

## Material and Methods

Most species were captured at light. For specimens not taken at light, the means of capture is given. Specimens of the species reported here for the first time for Portugal are retained in the collections of the original recorders, unless otherwise stated. However, many records are based only on photographic evidence. Original photos of several species new for Portugal are provided in this paper.

The order and nomenclature of families and species follows the Portuguese list (Corley, 2015) and subsequent updates in this series (Corley et al. 2016, 2018a, 2018b, 2019, 2020, 2021, 2022, 2023). The nomenclature of plant names follows the World Checklist of Vascular Plants database (Govaerts, 2024).

The entry for species new for Portugal concludes with a summary of the known European distribution taken from Karsholt & Razowski (1996) and other papers relevant to each case, and available information on the larval host-plant, given in square brackets if the information comes from outside Portugal.

### List of families and species

#### NEPTICULIDAE

*Trifurcula immundella* (Zeller, 1839)  
E: Praia do Samouco, 23-VI-2023, Rosete.

#### ADELIDAE

*Adela collicolella* Walsingham, 1904  
AAL: Ribeira Grande, S. of Figueira e Barros, 26-II-2023 daytime on *Cistus ladanifer* L., Cardoso and Nunes.

*Adela croesella* (Scopoli, 1763)  
DL: Marão, 2-VI-2023 daytime, Bryner.

#### TISCHERIIDAE

*Coptotriche berberella* (De Prins, 1984)  
E: Trafaria, 24-IV-2023, Fabião (REBN).

#### MILLIERIDAE

*Millieria dolosalis* (Heydenreich, 1851)  
BL: Chão do Ulmeiro, 2-VI-2023 daytime, Rosete; BAL: Porto de Alcácer, Mértola, larvae 8-IV-2021, adults emerged 17-X-2021, reared on *Aristolochia paucinervis* Pomel, confirming the host-plant suggested in Pires & Marabuto (2024), Nunes. The record from Portas do Ródão (Mendes, 1904) should be transferred from AAL to BB (see Recent literature, below).

## PSYCHIDAE

*Eotaleporia lusitaniella* (Amsel, 1955)

TM: Macieira, Alvadia, 5-VI-2023 daytime, Bryner (GP 2024-044 m).

*Oiketicooides hispanolusitania* Sobczyk, Arnscheid & Nuss, 2014

Second Portuguese record. TM: Moscoso, larvae 1-VI-2023, adults emerged 6-VIII-2023, Bryner.

## TINEIDAE

*Tenaga nigripunctella* (Haworth, 1828)

E: Trafaria, 23-IX-2023, Fabião, gen. prep. Fabião (100-4375 m), det. Nunes (REBN).

*Novotinea muricolella* (Fuchs, 1879)

E: Trafaria, 2-V-2023, Fabião (REBN).

\**Dryadula heindelii* Gaedike & Scholz, 1998

DL: Gassamar, Sandim, 7-VIII-2023, Nunes, conf. Gaedike (figure 1). Spain, France, Switzerland, Italy, Germany. [Larva on fungi *Bjerkandera adusta* (Willd.) P. Karst. and *Auricularia mesenterica* (Dicks.) Pers. (Gaedike, 2015)].

*Morphaga morella* (Duponchel, 1838)

R: Casalinho, Alpiarça, 5-X-2023, C. Silva and Lameira, det. Nunes (REBN); E: Verdizela, 10-VIII-2023, Hilário, det. Nunes (REBN).

*Reisserita zernyi* Petersen, 1957

E: Trafaria, 10-VI-2023, Fabião, gen. det. Fabião (REBN).

*Reisserita flavofimbriella* (Chrétien, 1925)

E: Trafaria, 3-VI-2023, Fabião (REBN).

*Trichophaga tapetzella* (Linnaeus, 1758)

E: Trafaria, 6-V-2023, Fabião (REBN).

*Elatobia fuliginosella* (Lienig & Zeller, 1846)

E: Trafaria, 21-VII-2023, Fabião (REBN).

*Tinea pellionella* Linnaeus, 1758

BL: Vilamar, in building, 25-IV-2023, Rosete, gen. det. Rosete (JR552 m).

*Monopis nigricantella* (Millière, 1872)

E: Trafaria, 17-XI-2023, Fabião, gen. det. Fabião (100-5129 m) (REBN).

*Oinophila v-flava* (Haworth, 1828)

E: Trafaria, 8-IV-2023, Fabião (REBN).

## GRACILLARIIDAE

*Parectopa ononidis* (Zeller, 1839)

E: Casais da Serra, 2-VI-2023, Fabião (REBN).

*Calybites phasianipennella* (Hübner, 1813)

E: Pó, 25-VI-2023, Cardoso.

*Phyllonorycter endryella* (Mann, 1855)

E: Ota, 26-XII-2023, Cardoso.

*Phyllonorycter tridentatae* Laštůvka & Laštůvka, 2006

DL: Susão, Valongo, larvae 26-III-2022, adults emerged 11-IV-2024, mines on *Genista tridentata* L., Nunes.

*Phyllonorycter klemannella* (Fabricius, 1781)

ALG: Barranco dos Pisões, 2-IV-2023, Valkenburg, det. Nunes.

#### YPONOMEUTIDAE

*Paradoxus osyridellus* Millière, 1869

E: Fincha Grande, Vau, 13-VII-2023, Cardoso, gen. prep. Cardoso (5958-1819 m).

#### GLYPHIPTERIGIDAE

\**Glyphipterix forsterella* (Fabricius, 1781)

BL: Abiúl, 16-IV-2023 daytime, Rosete, gen. det. Rosete (JR555 m) (figure 2). Almost all Europe, absent from most Balkan countries and some Mediterranean islands. [Larva on seeds of *Carex* L.].

#### LECITHOCERIDAE

*Homaloxestis briantiella* (Turati, 1879)

E: Trafaria, 23-VI-2023, Fabião, gen. det. Fabião (REBN).

#### OECOPHORIDAE

*Endrosis sarcitrella* (Linnaeus, 1758)

E: Trafaria, 18-III-2023, Fabião (REBN).

*Borkhausenia crinnodes* Meyrick, 1912

DL: Rio Sousa, Aguiar de Sousa, 12-X-2023, Nunes (REBN).

*Epicallima mercedella* (Staudinger, 1859)

E: Verdizela, 16-VII-2023, Hilário, det. Nunes (REBN).

*Epicallima formosella* (Denis & Schiffermüller, 1775)

R: Póvoa do Conde, 4-X-2011, Lemos.

#### PELEPODIDAE

*Carcina quercana* (Fabricius, 1775)

R: Areia de Baixo, Casa Branca, 10-X-2023, Alves (REBN).

#### COSMOPTERIGIDAE

*Alloclita recisella* Staudinger, 1859

E: Trafaria, 14-VII-2023, Fabião (REBN).

*Cosmopterix crassicervicella* Chrétien, 1896  
E: Casais da Serra, 2-VI-2023, Fabião (REBN).

*Anatrachyntis badia* (Hodges, 1962)  
Fourth Portuguese record. E: Praia do Samouco, 18-XI-2023, Rosete, gen. det. Rosete (JR648 m).

GELECHIIDAE

*Stomopteryx basalis* Staudinger, 1876  
R: Paúl do Boquilobo, 10-VIII-2023, Alves (REBN); E: Trafaria, 14-VII-2023, Fabião (REBN).

*Stomopteryx remissella* (Zeller, 1847)  
E: Casais da Serra, 2-VI-2023, Fabião (REBN).

*Mesophleps silacella* (Hübner, 1796)  
BA: Praia Fluvial de São Roque, Castelo Bom, 16-VII-2023, Rosete.

*Dichomeris acuminatus* (Staudinger, 1876)  
M: Fão, 14-X-2023, Gaifém (REBN).

*Brachmia blandella* (Fabricius, 1798)  
E: Cesaredas, Reguengo Grande, 8-VII-2023, Cardoso.

*Helcystogramma lutatella* (Herrich-Schäffer, 1854)  
E: Trafaria, 15-VI-2023, Fabião (REBN).

\**Acompsia cinerella* (Clerck, 1759)  
TM: Dine, 6-VII-2023, Corley and S. Ferreira, gen. det. Corley (GP6108) Nearly all Europe, absent from some Mediterranean islands. [Larva feeds on moss].

*Pectinophora gossypiella* (Saunders, 1844)  
E: Trafaria, 14-X-2023, Fabião, gen. det. Fabião (100-4814 f) (REBN).

*Bryotropha pallorella* Amsel, 1952  
E: Trafaria, 23-IX-2023, Fabião, gen. det. Fabião (100-4449 m) (REBN).

*Bryotropha basaltinella* (Zeller, 1839)  
Third Portuguese record. TM: Açureira, Bobal, Serra do Alvão, 31-V-2023, Bryner (GP 2024-025 f).

*Bryotropha umbrosella* (Zeller, 1839)  
E: Praia do Samouco, 23-VI-2023, Rosete, gen. det. Rosete (JR563 f).

*Aristotelia decoratella* (Staudinger, 1879)  
E: Trafaria, 9-VI-2023, Fabião (REBN).

*Mirificarma eburnella* (Denis & Schiffermüller, 1775)  
E: Casais da Serra, 19-V-2023, Fabião (REBN).

*Scrobipalpula psilella* (Herrich-Schäffer, 1854)  
E: Praia do Samouco, 23-VI-2023, Rosete, gen. det. Rosete (JR564 m).

*Klimeschiopsis terroris* (Hartig, 1938)

Delete record from TM (Corley *et al.*, 2020). It belongs to the following newly described species.

\**Klimeschiopsis arnoldfransorum* Huemer & Karsholt, 2023

TM: Estevais, Torre de Moncorvo, 24-IX-2019, Corley and S. Ferreira, gen. det. Corley (GP5922 m). The record was published as *K. terroris* Hartig, 1938 in Corley *et al.* (2020) but is now recognised as belonging to the new species recently described from Spain (Huemer & Karsholt, 2023). The 2005 record of *K. terroris* from Beira Baixa (Corley, 2015) is correctly named. Spain. Host-plant unknown.

*Caryocolum provinciella* (Stainton, 1869)

E: Praia do Samouco, 23-VI-2023, Rosete; BL: Lagoa de São José, Mata do Urso, 23-VI-2018, Rosete. Previously published records from BL (Corley *et al.*, 2015) were actually from E.

ELACHISTIDAE

*Elachista heringi* Rebel, 1899

Second Portuguese record. TM: Quintanica, Vale de Águia, 6-V-2023, Nunes, Fernandes, C. Silva and Jesus, gen. det. Nunes (GP0013 m).

*Haplochrois ochraceella* (Rebel, 1903)

M: Cevide, 4-VII-2023, Corley and S. Ferreira, gen. det. Corley.

COLEOPHORIDAE

*Coleophora congeriella* Staudinger, 1859

TM: Barragem de Bemposta, larvae 6-II-2023, adults emerged 27-IV-2023, reared on *Lotus dorycnium* L., Nunes, gen. det. Nunes (GP0014 m).

*Coleophora therinella* Tengström, 1848

Second Portuguese record. BL: Corticeiro de Cima, 7-VIII-2023, Rosete, gen. det. Rosete (JR643 m)

SCYTHRIDIDAE

*Scythris potentillella* (Zeller, 1847)

M: Torrinhelas, 3-VI-2023 daytime, Bryner (GP 2023-055 m).

*Scythris bornicensis* Jäckh, 1977

DL: Marão, 2-VI-2023 daytime, Bryner (GP 2023-052 m)

*Scythris scopolella* (Linnaeus, 1767)

E: Praia do Samouco, 23-VI-2023, Rosete.

BLASTOBASIDAE

*Blastobasis decolorella* (Wollaston, 1858)

M: São Vicente de Penso, Carcavelos, 7-VIII-2023, P. Gomes, det. Nunes (REBN).

\*\**Blastobasis lavernella* Walsingham, 1894

E: Trafaria, 11-X-2023, Fabião, gen. prep. Fabião, det. Nunes (REBN) (figure 3). Madeira. Host-plant unknown.

## LYPUSIDAE

*Agnoea filiella* (Staudinger, 1859)

Fourth Portuguese record. BL: Gândara dos Olivais, in building, 30-V-2023, Rosete, gen. det. Rosete (JR 569 m).

## PTEROPHORIDAE

*Agdistis satanas* Millière, 1875

E: Praia do Samouco, 23-VI-2023, Rosete, gen. det. Rosete (JR565 f).

*Stenoptilia gallobritannidactyla* Gibeaux, 1985

E: Praia do Samouco, 18-XI-2023, Rosete, gen. det. Rosete (JR647 m).

\*\**Merrifieldia garrigae* Bigot & Picard, 1989

This species was considered a synonym of *M. malacodactylus* by Gielis (1995) and also by Arenberger (1995), but DNA barcodes clearly distinguish the two species (BOLD). It has so far been confirmed from ALG, AAL, BL, BB and TM. Other records of *malacodactylus*, including those from BAL, R and BA, almost certainly refer to *M. garrigae*. It has been recorded from France including Corsica and Italy. In France the host-plant is *Rosmarinus officinalis* L. but in Portugal larvae have only been found on *Lavandula pedunculata* (Mill.) Cav. (Nunes records).

Delete *Merrifieldia malacodactylus* (Zeller, 1847). There is no evidence that this species is present in Portugal. All examined specimens belong to *M. garrigae*.

*Hellinsia carphodactyla* (Hübner, 1813)

BL: Castelo do Germanelo, 30-IV-2022, Rosete, gen det. Rosete (JR452 m).

*Adaina microdactyla* (Hübner, 1813)

Delete record from BL published in Corley *et al.* (2023). Specimen is *Hellinsia carphodactyla*.

## TORTRICIDAE

\**Clepsis dumicolana* (Zeller, 1847)

DL: Gassamar, Sandim, 7-VIII-2023, Nunes (figure 4). Potentially synanthropic species in apparent expansion from central Europe (Fazekas & Halász, 2020). [Larva on *Hedera* L.].

*Clepsis coriacanus* (Rebel, 1894)

ALG: Mexilhoeira Grande, 14-I-2023, Bragança, det. Nunes (REBN); DL: Nevogilde, 22-III-2023, Lima (REBN).

*Oporopsamma dunaria* Šumpich, 2011

E: Praia do Samouco, 23-VI-2023, Rosete, det. Rosete. Delete record from BL (Corley *et al.*, 2015), as this locality is in E.

\**Eana incanana* (Stephens, 1852)

TM: Dine, 6-VII-2023, Corley and S. Ferreira, gen. det. Corley (GP6107 f) Most European countries, Sicily, but not other large Mediterranean islands. [Larva on *Hyacinthoides* Heist. ex Fabr. and *Leucanthemum* Mill.].

*Cnephasia laetana* (Staudinger, 1871)

DL: Couce, 22-V-2023, Nunes, gen. prep. Nunes (GP0007 m).

*Acleris laterana* (Fabricius, 1794)

BL: Grada, Barcouço, 10-VI-2023, L. Silva, det. Nunes (REBN).

*Acleris variegana* (Denis & Schiffermüller, 1775)

R: Goucha, Alpiarça, 12-XI-2023, Galante and Francisco (REBN).

*Hysterophora maculosana* (Haworth, 1811)

Delete record from AAL, as locality (Portas do Ródão) is in BB (Mendes, 1904).

*Phalonidia contractana* (Zeller, 1847)

E: Trafaria, 4-VIII-2023, Fabião (REBN).

*Aethes francillana* (Fabricius, 1794)

E: Praia do Samouco, 24-IX-2015, Rosete, gen. det. Corley (GP4754 m).

*Neocochylis molliculana* (Zeller, 1847)

M: Pedreiras, Fão, 21-VIII-2023, Gaifém (REBN).

\**Platynota stultana* Walsingham, 1884

BL: Grada, Barcouço, 27-IX-2023, L. Silva, det. Nunes. Spain. A North American species, first detected in Spain in 2009 (Groenen & Baixeras, 2013). [Larva is polyphagous].

*Piniphila bifasciana* (Haworth, 1811)

E: Trafaria, 12-V-2023, Fabião (REBN).

*Lobesia botrana* (Denis & Schiffermüller, 1775)

M: São Vicente de Penso, Carcavelos, 6-VIII-2023, P. Gomes, det. Nunes (REBN).

*Bactra venosana* (Zeller, 1847)

E: Trafaria, 12-VIII-2023, Fabião, gen. det. Fabião (REBN).

*Ancyliis comptana* (Frölich, 1828)

Second Portuguese record. TM: Dine, 6-VII-2023, Corley and Ferreira.

*Crociosema plebejana* Zeller, 1847

BL: Quinta do Canal, Bizarreiro, pupa on *Hibiscus palustris* L., 14-VIII-2023, Rosete.

\**Eucosma subvittana* (Staudinger 1892)

BAL: Moinho do Alferes, 27-III-2017, Corley and Ferreira, confirmed by barcode; BL: Quinta do Canal, Bizarreiro, 22-VII-2017, Corley, Nunes and Rosete, confirmed by barcode. Zlatkov & Huemer (2023) suggest that south European records of *E. cana* (Haworth, 1811) are likely to belong to *E. subvittana*. Spain, Crete. Host-plant unknown.

Delete *Eucosma cana* (Haworth, 1811)

There is no evidence that this species occurs in Portugal.

*Epilema scutulana* (Denis & Schiffermüller, 1775)

M: Magusteiro, 3-VI-2023 daytime, Bryner (GP2023-77 m)

\**Notocelia mediterranea* (Obraztsov, 1952)

This species has recently been resurrected from synonymy with *N. incarnatana* (Hübner, 1800) by Šumpich et al. (2023). They give no Portuguese records. We have so far been able to confirm

Portuguese records from Algarve, Beira Litoral and Trás-os-Montes. The species is widespread in southern Europe extending north to Czechia and Austria. In the last-mentioned countries and in France it has been found together with *N. incarnatana*. Host-plant unknown.

Delete *Notocelia incarnatana* (Hübner, 1800)  
There is no evidence that this species occurs in Portugal.

*Clavigesta sylvestrana* (Curtis, 1850)  
E: Trafaria, 23-VI-2023, Fabião (REBN); Praia do Samouco, 23-VI-2023, Rosete.

\**Dichrorampha vancouverana* MacDunnough, 1935  
TM: Alto do Coro do Carlão, 13-VII-2023, Corley, gen. det. Corley (GP6116 m). Nearly all Europe except most Balkan countries and Mediterranean islands. [*Achillea millefolium* L.].

*Grapholita janthinana* (Duponchel, 1843)  
BAL: Vila de Frades, 13-X-2023, Jordão, det. Nunes (REBN).

#### BRACHODIDAE

*Brachodes funebris* (Feisthamel, 1833)  
BA: Praia Fluvial de São Roque, Castelo Bom, 16-VII-2023, Rosete, gen. det. Rosete (JR634 m).

#### SESIIDAE

*Synanthedon vespiformis* (Linnaeus, 1761)  
TM: Alto do Coro do Carlão, attracted to pheromone, 13-VII-2023, Corley.

#### PYRALIDAE

\**Aphomia cephalonica* (Stainton, 1866)  
TM: Alto do Coro do Carlão, 13-VII-2023, Corley, gen. det. Dale (MD03299 m) (figure 5). This is a synanthropic species of subtropical origin. It is probably adventive in most European countries but may be able to sustain outdoor populations in the southernmost parts of Europe (Huemer & Rabitch, 2002). [The larva is recorded from a range of stored foodstuffs, including dried fruit, cereals, nuts, chocolate and nutmeg].

*Galleria mellonella* (Linnaeus, 1758)  
R: Areia de Baixo, Casa Branca, 25-VII-2023, Alves (REBN).

*Hypsopygia costalis* (Fabricius, 1775)  
R: Paúl do Boquilobo, 13-XI-2023, Alves (REBN).

*Hypsopygia glaucinalis* (Linnaeus, 1758)  
M: São Vicente de Penso, Carcavelos, 20-IX-2023, P. Gomes (REBN); TM: Aveção do Cabo, Campeã, Vila Real, 7-X-2023, Fernandes (REBN).

*Pyralis farinalis* (Linnaeus, 1758)  
BA: São João de Lourosa, 7-X-2023, R. Ferreira (REBN); TM: Aveção do Cabo, Campeã, 27-VIII-2023, Fernandes (REBN).

*Stemmatophora brunnealis* (Treitschke, 1829)  
R: Areia de Baixo, Casa Branca, 22-VIII-2023, Alves (REBN).

*Loryma egregialis* (Herrich-Schäffer, 1838)

R: Alpiarça, 26-V-2023, Nascimento (REBN).

*Hypotia muscosalis* (Rebel, 1917)

E: Trafaria, 15-VI-2023, Fabião (REBN).

*Pempelia brephiella* (Staudinger, 1879)

E: Praia do Samouco, 23-VI-2023, Rosete, gen. det. Rosete (JR498 m).

\**Gymnancyla sfakesella* Chrétien, 1911

E: Trafaria, 18-VIII-2023, Fabião, gen. det. Fabião (100-3763 f), coll. Nunes (REBN) (figure 6). Spain (Gastón & Vives Moreno, 2018). [Larva on *Atriplex halimus* L.]

*Etiella zinckenella* (Treitschke, 1832)

R: Areia de Baixo, Casa Branca, 4-VIII-2023, A. Santos (REBN).

*Ceutholopha isidis* (Zeller, 1867)

Delete record from AAL, as locality (Portas do Ródão) is in BB (Corley *et al.*, 2016).

*Pseudacrobasis tergestella* (Ragonot, 1901)

E: Trafaria, 28-VII-2023, Fabião, gen. det. Fabião (100-3272 m) (REBN); BL: Larça, 30-VI-2023, L. Silva (REBN).

*Acrobasis advenella* (Zincken, 1818)

E: Pó, 22-VII-2023, Cardoso.

*Acrobasis legatea* (Haworth, 1811)

E: Ota, 5-VII-2023, Cardoso, gen. prep. Cardoso (5851-2444 f).

\**Eurhodope incensella* (Staudinger, 1859)

BAL: Vila de Frades, 6-V-2023, Jordão, det. Nunes (REBN). Spain. Host-plant unknown.

*Homoeosoma nimbella* (Duponchel, 1837)

DL: Rio Sousa, N. of Jancido, 30-V-2023, Nunes, gen. det. Nunes.

*Phycitodes inquinatella* (Ragonot, 1887)

E: Trafaria, 14-VII-2023, Fabião, gen. det. Fabião (REBN).

*Phycitodes saxicola* (Vaughan, 1870)

E: Trafaria, 2-IX-2023, Fabião, gen. det. Fabião (100-4052 f) (REBN).

*Ephestia elutella* (Hübner, 1796)

E: Trafaria, 9-VI-2023, Fabião, gen. det. Fabião (REBN).

*Ephestia parasitella* Staudinger, 1859

E: Fincha Grande, Vau, 13-VII-2023, Cardoso, gen. prep. Cardoso (6957-1814 f), gen. det. Corley.

*Ephestia woodiella* Richards & Thompson, 1932

E: Trafaria, 27-VI-2023, Fabião, gen. det. Fabião (REBN).

*Cadra figulilella* (Gregson, 1871)

E: Trafaria, 10-VI-2023, Fabião, gen. det. Fabião (REBN).

*Cadra calidella* (Guenée, 1845)

E: Trafaria, 21-VII-2023, Fabião, gen. det. Fabião (REBN).

#### CRAMBIDAE

*Achyra nudalis* (Hübner, 1796)

R: Areia de Baixo, Casa Branca, 5-VI-2023, Alves (REBN).

*Pyrausta purpuralis* (Linnaeus, 1758)

BL: Rio Seco, Reguengo do Fetal, 14-VI-2023, Mourão, det. Nunes (REBN).

*Uresiphita gilvata* (Fabricius, 1794)

R: Areia de Baixo, Casa Branca, 5-VIII-2023, Alves (REBN).

*Anania coronata* (Hufnagel, 1767)

TM: Aveção do Cabo, Campeã, 12-VIII-2023, Fernandes (REBN).

*Udea bipunctalis* (Herrich-Schäffer, 1851)

BL: Rio Seco, Reguengo do Fetal, 13-X-2023, Mourão, det. Nunes (REBN). Delete record from AAL, as locality (Portas do Ródão) is in BB (Mendes, 1904).

*Duponchelia fovealis* Zeller, 1847

R: Areia de Baixo, Casa Branca, 18-IX-2023, Alves (REBN); E: Abelheira, 3-V-2023, Mateus (REBN).

*Spoladea recurvalis* (Fabricius, 1775)

E: Maceira, 14-X-2023, A. Santos (REBN); M: São Vicente de Penso, Carcavelos, 7-X-2023, P. Gomes (REBN).

*Metasia suppandalis* (Hübner, 1823)

R: Paúl do Boquilobo, 10-VIII-2023, Alves (REBN).

*Cydalima perspectalis* (Walker, 1859)

E: Trafaria, 2-V-2023, Fabião (REBN); BL: Casal dos Claros, Amor, 8-VIII-2023, V. Duarte (REBN); TM: Aveção do Cabo, Campeã, 23-VIII-2023, Fernandes (REBN).

*Aporodes floralis* (Hübner, 1809)

R: Entroncamento, 8-VIII-2023, Martins (REBN); E: Maceira, 14-VII-2023, M. Duarte, det. Cardoso (REBN).

*Eurrhysis gutturalis* (Herrich-Schäffer, 1848)

R: Foros do Vale Mansos, 19-V-2014 daytime, Lemos.

*Evergestis isatidalis* (Duponchel, 1833)

R: Casalinho, Alpiarça, 8-XI-2023, C. Silva and Lameira (REBN).

R: Paúl do Boquilobo, 14-VI-2023, Alves (REBN).

*Phytometra sanctiflorentis* (Boisduval, 1834)

R: Paúl do Boquilobo, 13-V-2023, Alves (REBN).

*Eublemma cochylioides* (Guenée, 1852)

E: Trafaria, 11-X-2023, Fabião (REBN).

*Pandesma robusta* (Walker, 1858)

DL: Laborim de Baixo, 14-X-2023, Grosso-Silva.

*Catocala mariana* Rambur, 1858

E: Casais da Serra, 19-V-2023, Fabião (REBN).

*Catocala fraxini* (Linnaeus, 1758)

BL: Arganil, 6-X-2013, Lemos.

*Grammodes stolidia* (Fabricius, 1775)

R: Areia de Baixo, Casa Branca, 4-VIII-2023, A. Santos (REBN).

#### NOCTUIDAE

*Abrostola triplasia* (Linnaeus, 1758)

AAL: Sítio de Maceira, 13-IV-2023, Valadares (REBN).

*Thysanoplusia daubei* (Boisduval, 1840)

BL: Casal dos Claros, Amor, 8-X-2023, V. Duarte (REBN).

*Ctenoplusia limbirena* (Guenée, 1852)

M: Cambeses, 1 km N. of, Barcelos, 25-XI-2023, Grosso-Silva and Senra.

*Protodeltote pygarga* (Hufnagel, 1766)

E: Cesaredas, Reguengo Grande, 19-V-2023, Cardoso (REBN).

*Pseudozarba bipartita* (Herrich-Schäffer, 1850)

E: Trafaria, 6-VIII-2023, Fabião (REBN); BA: Almendra, 23-VIII-2023, Grosso-Silva.

*Acontia lucida* (Hufnagel, 1766)

DL: Gemunde, 14-IX-2023, C. Silva.

*Acronicta euphorbiae* (Denis & Schiffermüller, 1775)

E: Pinhal de Leiria, larvae on *Cistus salviifolius* L., 12-V-2014, Lemos.

*Calophasia hamifera* Staudinger, 1863

AAL: Sítio de Maceira, 22-VI-2023, Valadares (REBN); DL: Rio Sousa, N. of Jancido, 7-VII-2023, Pereira (REBN).

*Condica viscosa* (Freyer, 1831)

R: Paúl do Boquilobo, 9-X-2023, Alves (REBN); E: Verdizela, 23-IX-2023, Tavares.

\**Condica capensis* (Guenée, 1852)

E: Trafaria, 12-X-2023, Fabião, coll. Nunes (REBN) (figure 8). Spain, also Canary Islands and Madeira. [Larva reported on *Acanthus* L. and *Bidens* L. (Fibiger & Hacker, 2007)].

*Bryophila raptricula* (Denis & Schiffermüller, 1775)

E: Freixial, Bucelas, 10-IV-2023, Godinho, det. Nunes (REBN).

*Proxenus hospes* (Freyer, 1831)

BA: São Paio, 11-VIII-2023, Brandão.

*Trachea atriplicis* (Linnaeus, 1758)

TM: Aveção do Cabo, Campeã, 16-VIII-2023, Fernandes (REBN).

\**Chlorothalpa graslini* (Culot, 1913) (*Olivenebula xanthochloris* (Boisduval, 1840))

Ronkay & Ronkay (2023) reinstate *Chlorothalpa* Beck, 1996 from synonymy with *Olivenebula* Kishida & Yoshimoto, 1977 and transfer the western Palearctic European species of *Olivenebula* to *Chlorothalpa*. Moreover, *Chlorothalpa graslini* (Culot, 1913) is upgraded to species level from the level of subspecies of *Chlorothalpa xanthochloris* (Boisduval, 1840). Portuguese records of *C. xanthochloris* belong to *C. graslini*.

Delete *Chlorothalpa* (*Olivenebula*) *xanthochloris* (Boisduval, 1840)

There is no evidence that any Portuguese record refers to this species.

*Hydraecia micacea* (Esper, 1789)

Third Portuguese record. TM: Dine, 6-VII-2023, Corley and S. Ferreira.

*Luperina testacea* (Denis & Schiffermüller, 1775)

R: Casalinho, Alpiarça, 05-X-2023, C. Silva and Lameira (REBN).

*Rhizedra lutosa* (Hübner, 1803)

R: Goucha, Alpiarça, 12-XI-2023, Galante and Francisco (REBN).

*Denticucullus pygmina* (Haworth, 1809)

BAL: Vila de Frades, 13-X-2023, Jordão (REBN).

*Mesapamea didyma* (Esper, 1788)

BL: Casais do Porto, 6-IX-2008, Rosete, gen. det. Rosete (JR650 m).

*Cirrhia ocellaris* (Borkhausen, 1792)

Second Portuguese record. TM: Cabanelas, Chelas, 04-X-2023, Fernandes and Gonzalez.

*Agrochola helvola* (Linnaeus, 1758)

R: Casalinho, Alpiarça, 08-XI-2023, C. Silva and Lameira, det. Nunes (REBN).

*Agrochola circellaris* (Hufnagel, 1766)

R: Casalinho, Alpiarça, 15-XI-2023, C. Silva and Lameira (REBN).

*Conistra intricata* (Boisduval, 1829)

BA: Rio Alva, Fontão, 1-I-2014, Lemos.

*Lithophane ornitopus* (Hufnagel, 1766)

BL: Arganil, 26-II-2018, Lemos.

*Ipimorpha retusa* (Linnaeus, 1761)

DL: Gemunde, 11-VII-2018, C. Silva.

*Dryobotodes eremita* (Fabricius, 1775)

BAL: Vila Verde de Ficalho, 17-XI-2023, Valadares (REBN).

*Dryobotodes roboris* (Geyer, 1835)

DL: Rio Sousa, Aguiar de Sousa, 12-X-2023, Nunes (REBN).

*Ammopolia witzenmanni* (Standfuss, 1890)

BAL: Vila Verde de Ficalho, 17-XI-2023, Valadares (REBN); R: Casalinho, Alpiarça, 15-XI-2023, C. Silva and Lameira, det. Nunes (REBN).

*Anarta gredosi* (de Laever, 1977)

BA: Moinhos d'Aveia, 23-VI-2023, Valadares (REBN).

*Melanchra persicariae* (Linnaeus, 1761)

DL: Águas do Marão, 11-VII-2023, Fernandes, C. Silva and Jesus.

*Hadena compta* (Denis & Schiffermüller, 1775)

ALG: Aljezur, 3 km W. of, 8-VIII-2023, Valadares, det. Nunes (REBN).

*Mythimna languida* (Walker, 1858)

BL: Casal dos Claros, Amor, 14-XI-2023, V. Duarte (REBN).

*Leucania joannisi* Boursin & Rungs, 1952

DL: Parque Biológico de Gaia, 8-IV-2023, J. Gomes, det. Valadares (REBN).

*Agrotis sabulosa* Rambur, 1837

E: Praia do Samouco, 10-X-2013, Rosete.

*Agrotis alexandriensis* Bethune-Baker, 1894

This species is only present in Algarve (José Luis Yela, pers. comm.). Records from E, BL and DL belong to *A. ripae*.

\**Agrotis ripae* (Hübner, 1823)

This species was rejected by Corley (2015) as all Portuguese records were considered to belong to *A. alexandriensis* Bethune-Baker, 1894. Following advice from José Luis Yela the species is reinstated with records from E, BL and DL.

*Cerastis faceta* (Treitschke, 1835)

BAL: Vila Verde de Ficalho, 18-II-2023, Valadares (REBN).

*Noctua fimbriata* (Schreber, 1759)

E: Praia do Samouco, 23-VI-2023, Rosete, gen. det. Rosete (JR502 f).

*Xestia castanea* (Esper, 1798)

BL: Condeixa-a-Nova, 17-IX-2015, I. Ferreira, Jesus and Rosete.

## NOLIDAE

*Nycteola siculana* (Fuchs, 1899)

R: Casalinho, Alpiarça, 10-X-2023, C. Silva and Lameira, det. Nunes (REBN).

*Earias clorana* (Linnaeus, 1761)

R: Paúl do Boquilobo, 10-VIII-2023, Alves (REBN).

### Recent literature

Bengtsson (2024) raises *S. terrenella* (Zeller, 1847) from synonymy with *S. tributella* (Zeller, 1847). Portuguese records of *S. tributella* all belong to the widespread *S. terrenella*. *S. tributella* appears to be confined to Sicily.

Corley et al. (2023) add eight species to the Portuguese Lepidoptera fauna and delete one.

Ferreira et al. (2024) publish information on barcodes of Portuguese moths from the InBIO Barcoding Initiative.

Gil et al. (2021) report *Pseudopanthera macularia* (Linnaeus, 1758) for Douro Litoral.

Gil & Grosso-Silva (2023) report two new species for Douro Litoral: *Scythris sinensis* (Felder & Rogenhofer, 1875) and *Synanthedon conopiformis* (Esper, 1782).

Grosso-Silva & Senra-Martins (2023) add Minho to the distribution of *Yponomeuta evonymella* (Linnaeus, 1758).

Nunes (2023) publishes further additions to the Lepidoptera of Lousada, adding two new species for Portugal, *Stigmella regiella* (Herrich-Schäffer, 1855) and *Enarmonia formosana* (Scopoli, 1763), 13 new species for Douro Litoral and additional data on host-plants of a number of species. Although *Zelleria oleastrella* (Millière, 1864) was reported for the first time in the same province, this was not explicitly highlighted in that work.

Nunes et al. (2024) add *Agonopterix cachritis* (Staudinger, 1859) to the Portuguese fauna. The species was previously only known from Spain, where it may be extinct.

Pires & Marabuto (2024) add two new provinces (Estremadura and Beira Alta) to the distribution of *Millieria dolosalis* and provide an update on current knowledge of the species in Portugal. This work has brought a confusion of localities into focus. In that paper the first Portuguese record of the species by Mendes is stated to be from Beira Baixa, but in Corley (2015) the locality is said to be in Alto Alentejo. The place name in question, Portas do Ródão refers to two facing crags on opposite sides of

the Rio Tejo, one in Beira Baixa and one in Alto Alentejo. There is no known evidence on which side Mendes collected *M. dolosalis* (and two other species) but as he was based at São Fiel, near Fundão some 60 km north of this locality, on the balance of probability he would have visited the north side, not the south. Furthermore, he could have travelled from Fundão to Vila Velha do Ródão and possibly beyond by train. We therefore propose that Mendes' records from this locality are assumed to be from Beira Baixa.

Pires et al. (2024) record *Gracillaria syringella* (Fabricius, 1794) from Alto Alentejo, as a new species for the Iberian Peninsula, although there is an earlier published record from Spain (Vives Moreno, 1991, p. 264 as *G. microdactylella* (Denis & Schiffermüller, 1775)). The moth in Portugal was not collected but named from a photograph. According to Zdenek Laštůvka the figured moth is not *Gracillaria syringella* but appears to be *Caloptilia loriollella* (Frey, 1881). In the absence of a specimen, we treat both suggested names as unconfirmed.

Russell & Vane-Wright (2022) reverse the invalid lectotypification of *Hipparchia hermione* Linnaeus, with the result that the correct name for the Portuguese species is *H. alcyone* (Denis & Schiffermüller, 1775).

Zlatkov & Huemer (2023) reinstate *Eucosma subvittana* (Staudinger, 1892) from synonymy with *E. cana* (Haworth, 1811). They mention probable records from Portugal based on barcodes in BOLD. They suggest that all records of *E. cana* from southern Europe are likely to belong to *E. subvittana*.

### Appendix: Changes to the Portuguese fauna list

Species added to the Portuguese fauna listed in this and other papers are summarised here, each with a number indicating their placement in the checklist (Corley, 2015). New genera for the Portuguese fauna show the author and year of publication of the genus.

Name changes resulting from changes at genus level or to new synonymy are given, with each species retaining its list number. In a case where a new name is provided for a previously misidentified species, the new species retains the number of the misidentified species. Thus, *Scythris terrenella* (Zeller, 1847) replaces *Scythris tributella* (Zeller, 1847) which was previously misidentified, but the species retains the number 0876 in the checklist.

- 0022.1 *Stigmella regiella* (Herrich-Schäffer, 1855)
- 0163.1 *Dryadula heindeli* Gaedike & Scholz, 1998
- 0333.1 *Glyphipterix forsterella* (Fabricius, 1781)
- 0454.1 *Agonopterix cachritis* (Staudinger, 1859)
- 0550.1 *Acompsia cinerella* (Clerck, 1759)
- 0679.1 *Klimeschiopsis arnoldfransorum* Huemer & Karsholt, 2023
- 0876 *Scythris terrenella* (Zeller, 1847) (*tributella* auct. nec Zeller, 1847)
- 0895.1 *Blastobasis lavernella* Walsingham, 1894
- 0957 *Merrifieldia garrigae* Bigot & Picard, 1989 (*malacodactylus* auct. nec Zeller, 1847)
- 0979.1 *Platynota stultana* Walsingham, 1884
- 1005.1 *Clepsis dumicolana* (Zeller, 1847)
- 1015.1 *Eana incanana* (Stephens, 1852)
- Enarmonia* Hübner, 1826
- 1128.1 *Enarmonia formosana* (Scopoli, 1763)
- 1151 *Eucosma subvittana* (Staudinger 1892) (*cana* auct. nec Haworth, 1811)
- 1164 *Notocelia mediterranea* (Obraztsov, 1952) (*incarnatana* auct. nec Hübner, 1800)
- 1178.2 *Dichrorampha vancouverana* MacDunnough, 1935
- 1328 *Hipparchia alcyone* (Denis & Schiffermüller, 1775) (*hermione* auct. nec Linnaeus, 1764)
- 1410.1 *Aphomia cephalonica* (Stainton, 1866)
- 1460.1 *Gymnancyla sfakesella* Chrétien, 1911
- Eurhodope* Hübner, 1825

- 1511.1 *Eurhodope incensella* (Staudinger, 1859)  
 1835.1 *Scotopteryx mucronata* (Scopoli, 1763)  
 1975.1 *Selenia tetralunaria* (Hufnagel, 1767)  
 2290.1 *Condica capensis* (Guenée, 1852)  
*Chlorothalpa* Beck, 1996  
 2328 *Chlorothalpa graslini* (Culot, 1913) (*Olivenebula xanthochloris* auct. nec Boisduval, 1840)  
 2532.1 *Agrotis ripae* (Hübner, 1823)

## Acknowledgements

We are extremely grateful to all the recorders who have provided records for this paper. We also thank Mike Dale for dissections, Dr Zdenek Laštůvka for sharing his expert knowledge of *Caloptilia*, Dr José Luis Yela for valuable advice on *Agrotis* species, Dr Reinhard Gaedike for confirming the identification of *Dryadula heindeli* and André Lameirinhas for the photo of *Glyphipterix forsterella*. We are most grateful to Ernesto Maravalhas for preparing the map. The fourth author would also like to thank the Câmara Municipal de Mértola and the Associação de Municípios Parque das Serras do Porto for funding the fieldwork which produced the records obtained in these areas.
