Abstract
The work presents an instrument “Inventory for the analysis of the relation of help between the Social Worker and the Client during the phase of study and evaluation of the situation problem”. The above mentioned instrument reflects a set of criteria of intervention, defined in the shape of strategies, technologies and present skills in the first meetings of the relation of help, and that allows to determine adequately a context of intervention. The inventory is constituted as an instrument of auto-observation of the professional conduct that allows to value the level of importance of each one of his articles, as well as the perception of the pragmatic level of accomplishment of the same ones.

Keywords
Inventory, relation of help, contexts of intervention, social casework, evaluation of situations problem.
