Abstract
This is a report of the type specimens of Cicadellidae housed in the collection of División Entomología, Museo de La Plata (MLP). 99 type specimens appertaining to 41 species of the family Cicadellidae were examined and listed: seven Typhlocybinae and 34 Deltocephalinae. They were described by the following authors: Torres, Berg and Linnavuori. For each type specimen information is given about the specific name, bibliographical reference and type category, and label data.
