Abstract
In this paper I describe what is the professional called "public manager". First, it is a conceptual description, therefore, I will use a metaphor to illustrate it. Second, I discuss the main functions that such a professional should perform. Further, I discuss the necessary course structure for an appropriate education of a public manager. Finally, I analyze Chile's political system and call attention for the need of a well-educated public manager.

Keywords
Public manager, course structure, Chile's political system.
