Abstract

This paper described the thalli of *Choreonema thuretii* (Bornet) Schmitz and *Titanoderma pustulatum* var. *confine* (P. et H. Crouan) Y. Chamberlain; its habitat, tidal level, reproductive stage and its distribution of the Mexico's coast. *Choreonema thuretii* is reported for first time from Oaxaca and *Titanoderma pustulatum* var. *confine* is reported from the northwest Coast of Baja California, México. In the Mexican's herbariums We not found specimens of *Titanoderma*; however, during this review We found new data and plants of *Titanoderma* in the herbarium ENCB and also We collected some samples in Baja California's shores.

Keywords

New reported, Corallinaceae, *Choreonema*, *Titanoderma*, Mexico.
